

Cloudhouse Quality Policy

Cloudhouse aims to become the market leader in Cloud based application delivery and performance optimization.

In meeting the above, Cloudhouse also aims to achieve high levels of customer satisfaction by delivering reliable, high quality, cost effective services and software products within agreed timeframes thus generating the returns required to:

- Reward stakeholders for their investment.
- Reward our people for their efforts.
- Provide the funds to support future operations and company growth.
- Provide a stable and enjoyable work-place for the entire team.
- Give customers the confidence in our products and service to depend on them for critical systems.

Cloudhouse is committed to the continual improvement of its performance by the monitoring of quality issues and through involvement with customers, suppliers, regulatory authorities and the community.

To assist with the above, Cloudhouse has implemented the Cloudhouse Quality Management System that is designed to meet the requirements of ISO 9001:2015.

Compliance and continual improvement is monitored by process measures and internal audits and is maintained by the timely implementation of preventive and corrective actions. These processes be designed to assure that the company will meet all legal and regulatory obligations.

Meeting these standards is the responsibility of the entire team. Cloudhouse is therefore committed to working with all stakeholders to support effective operation of the Cloudhouse Quality Management System and the achievement of goals and specific Quality Objectives are set and Risk Management are part of our strategic direction.

This policy will be made available to all interested parties as appropriate.
